**CASE STUDY**

## CLIENT'S STORY

Janice & Steve Barker came to us after completely falling out of love with their old kitchen. The hinges & drawers had stopped working. They didn't have enough storage. And even though it was a relatively small kitchen, they both felt they could do more with the space.

## SOLUTION

Our senior designer Guy, wanted to add more storage & light in the new Kitchen Design. With extra tall units & light grey gloss j-pull units planned into the new design, finished off with stunning quartz worktops & LVT flooring. The added benefit of a high gloss finish is that it reflects the light around the room making the kitchen appear bigger. We also decorated the space, completely transforming the room.

## RESULTS & CLIENT FEEDBACK

"Thank you to Guy, Kyle and the team for my new kitchen! I love it! Having only a small kitchen, we were limited with what could be done, but my aim was to modernise, remove the clutter and hide the appliances. It now feels bigger and so much lighter and my aims achieved. Kyle kept in contact with us throughout the work and both Kyle and Guy came round to check we were happy with everything once the job was finished. Would definitely recommend The Design Studio!"
