## CLIENT'S STORY

Norman & Lynn Yates contacted us as they wanted to replace their dated old kitchen and their old multi coloured tiles with a clean, modern kitchen space. It was very important to Norman & Lynn that the project was fully project managed, having our own in house project manager ticked that box.

## SOLUTION

We completely stripped out the old kitchen, removing all units & tiles. The room was then completely re plastered. Storage was key for Norman & Lynn, so we made sure the tall units & wall units went up to the ceiling. We designed and fitted stunning gloss cashmere units, that not only lightened the whole space but because of the gloss units actually reflect the light making it appear even brighter, and this was accentuated with our ever popular ice white quartz worktops. We finished off their gorgeous new kitchen with all new Neff appliances and quooker 3-1 boiling hot water tap. To complete the room the flooring was done in LVT & walls painted white. This has completely transformed the room into light & bright inviting space.

## RESULTS & CLIENT FEEDBACK

"A huge thank you to Guy and his team at The Design Studio for creating our amazing kitchen. The team worked so well with expertise in all aspects. In particular, a big thank you to the fitters and especially to Liam for ensuring a perfect conclusion to the works. Thanks to Guy for his wonderful design. The kitchen has been transformed from a traditional dull kitchen to a bright and effective working environment. Many thanks to all for a professional, well executed job."
