MR AND MRS WOODS
CASE STUDY

CLIENT'S STORY

Sally & Steve Woods first came to us as they were very unhappy with their old kitchen it was a dark small and uninviting space. Both Sally & Steve felt the room had potential with the correct design.

SOLUTION

We stripped the old kitchen back to a shell and decided to take down a wall to make one kitchen/living space, whilst creating a separate utility room. As both Sally & Steve love socialising it was important that the new layout was an open & inviting space. The inclusion of a wine cooler & hot tap finished it off nicely! The kitchen units were our light grey matt J-Pull style. Finished off with ice white quartz worktops, with matching upstands and splash back.

RESULTS & CLIENT FEEDBACK

"A massive Thank you to all The team at the design studio Chorley. Guy, Kyle, and all the trades involved in making our dream kitchen happen. We have had a wall knocked down and the entire downstairs layout changed! This was project managed by Kyle and we are super pleased. Guys kitchen design has meant we now function as a family in a gorgeous new living space! Can't praise the team enough. The kitchen fitters. We had many trades involved in the build who also we would like to thank!! The entire team have really made our vision come to life. Cheers all"
